

MOHIEDDIN TANNA

Strategic Tech Leader Building High-Performing Teams

mohieddintana93@gmail.com | linkedin.com/in/mohie93 | github.com/mohiekodo | Kuala Lumpur, Malaysia

SUMMARY

Software engineer and technical leader with over 8 years of experience building distributed systems and high-performing teams. Led engineering across recruitment tech at SEEK, real estate at PropertyGuru, and data platforms at Supahands -- growing from individual contributor to leading cross-functional teams across multiple geographies. Passionate about modernising legacy architecture, mentoring engineers, and aligning technical strategy with business outcomes.

EXPERIENCE

Lead Engineer -- SEEK

September 2024 - Present

- Own technical direction and end-to-end delivery for the Candidates and Talent Consultants domains, leading distributed engineering teams from planning to production
- Designed and scaled backend services on Node.js, TypeScript, Express.js, AWS, and OpenSearch powering enterprise recruitment workflows
- Raised the engineering bar -- authored coding standards, introduced code-review SLAs, and built QA frameworks now adopted org-wide
- Drive quarterly roadmapping and sprint planning in close partnership with product leadership
- Improved API reliability and latency across talent management platforms through architectural changes and observability improvements
- Mentor engineers at all levels through structured 1:1s, technical pairing, and individual growth plans

Tech Team Lead -- PropertyGuru Group

December 2022 - September 2024

- Led distributed engineering teams across multiple offices to deliver new capabilities for PropertyGuru's core data software platform
- Drove architectural modernisation -- decomposing legacy monoliths using NestJS, React.js, and AWS
- Partnered with product managers on roadmap sequencing, translating technical constraints into delivery milestones
- Built team cohesion across distributed teams through structured knowledge transfer and remote pairing practices
- Owned technical design reviews for major platform changes, balancing velocity with maintainability

Software Engineer -> Tech Lead -- Supahands

November 2017 - November 2022

- Grew from Software Engineer to Tech Lead over 5 years, owning full delivery for the Annotation Platform and SelfServe product
- Led cross-functional teams to ship SelfServe from conception through enterprise client adoption
- Architected a microservices system using React.js, Next.js, and RESTful APIs on AWS for horizontal scalability
- Optimised database queries and introduced caching strategies, reducing data pipeline processing times
- Established automated testing and CI/CD workflows with GitHub Actions, cutting regression incidents

- Mentored junior engineers through code reviews, pairing sessions, and development planning

SKILLS

Languages: JavaScript, TypeScript, Go, Python, Ruby
Backend: Node.js, Express.js, NestJS, Ruby on Rails
Frontend: React.js, Next.js
Databases: PostgreSQL, MySQL, MongoDB, OpenSearch, Redis
Cloud & DevOps: AWS (Lambda, ECS, RDS, S3, CloudWatch), BuildKite, GitHub Actions, Docker
AI: Prompt Engineering, Generative AI, LLM Fine-tuning, LLM Evaluation
Leadership: People Management, SDLC Management, Technical Roadmapping

SELECTED PROJECTS

Enterprise Platforms For TC (SEEK)
Node.js, Express.js, TypeScript, AWS, OpenSearch, PostgreSQL
PropertyGuru Data Software Solutions Platform
NestJS, React.js, TypeScript, PostgreSQL, AWS
Supahands Annotation Platform & SelfServe
React.js, Next.js, Node.js, REST, Microservices, AWS
